Dear Gary,

Certified Radio and B&B Electronics have worked closely with Nutec Telephones for the past five years. After having numerous service issues with another phone company, we decided to purchase a new NEC phone system, which would provide flexibility and growth for the future.

During the course of our business relationship with Nutec, customer service, sales and technicians have worked closely to provide our business with the right solutions. The SV8100 product from NEC is definitely the right product. Our business needed a quick turn around, due to our needing both PRI (digital) and analogue service. Nutec's total staff was exceptional, training was outstanding and they installed four phone systems on the same day!!

All of us at Certified Radio and B&B Electronics highly recommend Nutec Telephones to other businesses.

Best Regards,

A handwritten signature in blue ink, appearing to read "Kelly Cooley". The signature is fluid and cursive, with a long horizontal stroke at the end.
